THE SHORT SPEECH

Greetings to his Excellency Dep-Gov. of Kaduna State, Members of the National and States Houses of Assemblies, Our Royal Fathers, Gentlemen of the Press, distinguished Ladies and Gentlemen.

The **Austro-Nigerian Initiative** is a non-governmental and a non-profit organization based in Vienna, Austria. This organization aims to initiate and promote educational, economical and cultural

development projects between Austria and Nigeria, hereby creating new perspectives for the people of both countries.

Concerning this donation, we realised that it is always easy to make donations and turn your back but after a certain period of time, thinking in terms of maintenance and repairs the donated equipments turn out to be problems for the recipients of such donations.

In this case , **Austro-Nigerian Initiative** has decided to work differently. We are not only donating but we shall be assisting in the maintenance and repairs of these equipments as well.

Interested youths from this LGA shall be trained at our center in Kaduna so that in the near future, they will be capable of solving all technical problems themselves.

These equipments have been donated to us by the **Federal Ministry Of Justice Vienna, Austria** and the transportation to Nigeria was funded by the **Dept. of International Relations, State of Vienna, Austria.**

Zangon Kataf is the first step in this model of **partnership for progress**, we hope to reach other LGAs in Kaduna State and other states in Nigeria as soon as we have the necessary support from those areas.

I seize this opportunity to humbly thank His Honourable, **Mathew Gwazah** for his idea on this project

and for the support and encouragement on this new partnership.

Thank you all for your attention.

Speech delivered at Zangon Kataf on the 26 May 2005 by the Coordinator A-NI, Magister A. Banwo.
